The Atchafalaya Basin Floodway System is designed to protect southern Louisiana from Mississippi River floods by diverting, if necessary, up to one half of the combined flows of the Red and Mississippi rivers to the Gulf of Mexico via the Atchafalaya.

The overall system, called the Mississippi River & Tributaries Project, is designed to do this while at the same time retaining and restoring the long-term natural productivity of the Atchafalaya Basin.

Project features to provide public access, environmental protection, developmental control and recreational opportunities were authorized by Congress in conjunction with flood control.

All U.S. Army Corps of Engineers property are subject to Title 36-Parks and Public Property: CHAPTER III U.S.ARMY CORPS OF ENGINEERS PART 327.

For a full copy of these rules and regulations please visit the web page below.

HIKING ON INDIAN BAYOU

Indian Bayou contains some of the country's most productive wildlife habitat. It's a paradise for hunters, fisherman, boaters, nature photographers and outdoor enthusiasts. Now Indian Bayou is home for hiking enthusiasts, too, who can enjoy part of the world's largest freshwater swamp wilderness.

As managers of these public lands and water for recreation and enjoyment, the

U.S. Army Corps of Engineers, New Orleans District,

welcomes and invites you to experience Indian Bayou firsthand. So grab up your hiking gear and visit Indian Bayou Hiking Trails.

The Corps of Engineers has mapped out a network of about 25 miles of trails throughout Indian Bayou. Of these, 13 miles of trails have been designated specifically for hiking. These trails are clearly

marked in green on the color photographic map available at the following web page:.

<http://www.mvn.usace.army.mil/recreation/Indian%20Bayou.jpg>

Indian Bayou offers a great opportunity to view scenic areas of hardwood forests, cypress swamps and bayous. The area also contains forested wetlands and shallow lakes that provide excellent feeding and resting areas for wading birds like the great blue heron and the great egret.

Waterfowl, such as the mallards and wood ducks, can also be found in abundance. Numerous species of reptiles and amphibians are common. Be cautious, you may run into an American alligator!

To ensure your enjoyment and safety, please observe posted rules and regulations and all safety precautions when using the hiking trails. Visitors should be alert to the natural hazards of wildlife,

logs, stumps and rocks along the trails. Don't forget, this is South Louisiana.

Please also make sure that someone knows where you are hiking, in case you need assistance.
